

CERAMIC CROWNS

- Extensively decayed, chipped or cracked and cannot be restored are advised for a Crown.

We at **Smile Care Dental Clinic** offer the **Best of Full Ceramic**

Crowns with (no metal) is made of the latest material known as the

Zirconia/ Zirconium, by **fully computerised system** to avoid human error,

Hence has a *superior strength* and offers *unmatched aesthetic system!!*

- Porcelain or ceramic crowns are shade matched to your natural teeth with utmost care to your aesthetics.

- Metal Alloys generally may be recommended for back teeth.

CERAMIC BRIDGES

We understand your need for a fixed bridge
As compared to that of Partial Denture,
That which is not always preferred by the patient!

A bridge may be recommended if you're missing one or
more teeth.

Gaps left by missing teeth eventually
Cause the remaining teeth to
Rotate or shift into the empty spaces causing food
lodgement and other related problems.

Bridges are cemented to the natural teeth by taking support
of adjacent teeth, so as to provide you with fixed
prosthesis.

Similar as to the Dental Crown, **Zirconia/ Zirconium**
Material can be used for making of the bridge.

Especially for front teeth where
Aesthetics and Strength Is a Must!
