

DENTAL IMPLANT

Dr. Amit Gupta is an Oral Surgeon and a Dental Implantologist with a number of Successful of patients for dental Implants.

Prior to the treatment, Study models, X-Rays, etc are done so as to avoid any complications during the treatment.

The treatment is carried out in a sterilised environment taking asepsis and sterilization under consideration.

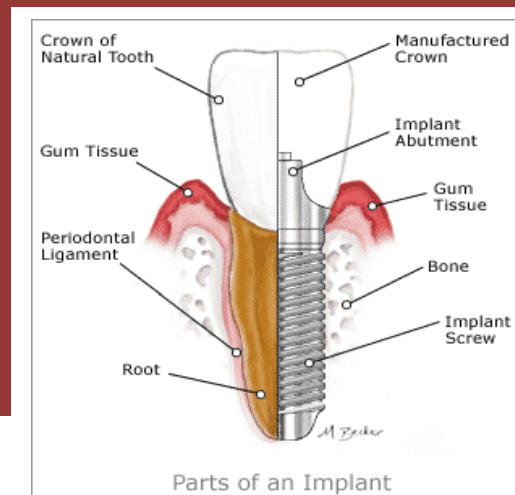

With Experience from Single Implant case to Multiple Implant insertion cases to patients with full mouth over-dentures using implants.

✓ While the upfront cost for implants can be more than for other types of restorations, the investment can pay off in the long run.

✓ Implants are devices that replace the roots of missing teeth, and are used to support crowns, bridges or dentures.

✓ Implants are placed in your jawbone surgically.

Most of the time, implants feel more natural and secure than other methods of replacing missing teeth, such as dentures.

➤ You *do not* necessarily need an implant for every missing tooth. Your dentist can discuss how many implants you will need.

Dental Implants are more teeth saving than traditional crown and bridge, grinding of adjacent teeth does not take place.

Single Tooth Implant:-

Removable Complete Denture:-
