

ORTHODONTIC TREATMENT:

At Smile Care Dental Clinic we have a visiting Orthodontist who has special training in dealing with facial abnormalities and disorders of the jaw.

Any orthodontic problem may be classified as a malocclusion, or "bad bite."

In most cases, the ideal time for orthodontic treatment, is between the ages of 10 and 14, although the re-alignment of teeth can be done at any age.

There are **various treatment options**:-

- ✓ Brackets, which may be **Metal** or **Tooth-coloured** that are bonded to teeth.
- ✓ **Lingual-type** brackets that attach to the back of teeth, hidden from view.
